Ref.4961 Cityline kit

+ Classic

Is the best selling kit of the market.

Includes the Loft Colour monitor and the Cityline panel, robust and high weather resistant.

Its aesthetic and resistance make it always the right decision.

Ref.4889 OneToOne kit

+ Accessibility

The most accessible kit of the market.

This kit interacts with the user thanks to the OneToOne module that indicates by means of illuminated LEDs what is going on (house call, conversation, open door, busy channel), making the access to the home easier.

Ref.4892 Biovision kit

+ Biometric

The Cityline panel includes a built-in fingerprint reader. Furthermore, the control is being reinforced thanks to a built-in proximity reader for greater security. Allows up to 4.500 registered users.

The fingerprint is the best entrance key to homes and business, because it is unique and untransferable.

Ref.4984 Memovision kit

+ Control

The panel includes a keypad that allows opening the door by means of a code. Allows up to 100 codes for 100 different users.

Highly recommended for offices and business where an access control is required.

Ref.4887 Private kit

+ Proximity

The Cityline panel includes a built-in proximity reader. The identifier is a card or a proximity keyring. By swiping the proximity card or keyring, the reader allows the access to the users that have been previously registered.

The kit includes 5 proximity cards and a proximity keyring.

All kits include digital VDS technology working with 3 wires+coax or with a UTP CAT5 wire. Kits are supplied complete with an outdoor panel with colour camera, flush box, power supply and colour monitor.

Ref.4955 Memory kit

+ Security

Includes a Loft Colour Memory monitor with image recording function.

The monitor stores a picture of everyone who calls at the outdoor panel. Once at home, you can check all the visits received. Stores up to 128 images.

Ref.4950 iLOFT kit

+ Luxury

Includes an iLoft monitor for flush mounted installation with hands-free communication.

Compact and extra slim. Its attractive design and materials fit in with the most cutting edge architecture and luxury homes.

Ref.4954 Surface iLOFT kit

+ Surface

Includes an iLoft monitor for surface installation with hands-free communication.

Allows the installation of the monitor with no need to make holes in the wall.

All kits include digital VDS technology working with 3 wires+coax or with a UTP CAT5 wire. Kits are supplied complete with an outdoor panel with colour camera, flush box, power supply and colour monitor.
